

We're Back!!

Welcome back to our newsletter. We have had a break while we focused on re-developing our website. Even customers who we have dealt with since the very early days are sometimes unaware of the huge range of products we are able to supply, and our new website helps break products down into categories for your convenience. We are more likely to supply something than not, so check out our website at:

www.lyan-packaging.co.uk

and contact us about your 'one stop shop' requirements.

There is a facility on the new site to review our newsletter archives for your reference, but if you would like future newsletters to be delivered via e-mail rather than by traditional post, please complete your details below and fax back:

Stretchwrap News

Here at Lyan Packaging, we are getting fed up with hearing from manufacturers of price increases on top of price increases. To counteract this and offer our customers some hope in these dark times, we are now importing stretchwrap.

What does this mean to you, the customer? Good question!!

The price we now offer is as competitive as anyone in the UK market based on current market prices, and you have added peace of mind knowing we have stock of material.

We import and stock the following specifications:

- 500mm x 23mu Cast power pre stretch machine film
- 500mm x 20mu Cast power pre stretch machine film
- 500mm x 20mu Standard cast film
- 400mm x 300m x 17mu Hand rolls on standard cores
- 400mm x 300m x 20mu Hand rolls on standard cores

If you have a specific usage not covered by the above, we can organise any other size or micron you require and stock it for you.

**Are you using the correct stretchwrap?
Can you save pounds by changing
thicknesses?**

We would be pleased to visit you and give you advice on your stretchwrap and packaging requirements.

Important! E-mail Addresses

Please ensure that you are using our correct e-mail addresses: sales@lyan-packaging.co.uk
admin@lyan-packaging.co.uk
accounts@lyan-packaging.co.uk

Profile

Name: **Tony Williams**
Position: Driver
Age: 38
Lives: Ruabon, Wrexham

Likes/Dislikes: Everton FC make up both my biggest like and dislike! Love it when they win, but unfortunately that's not been that often so far this season. That's my biggest dislike, the state of the management, and like any true fan, think I could do a much better job myself!

Ambitions: As long as I remain happy and contented, that'll do me, but should I win the lottery, I wouldn't complain!

Trade show/Exhibition Essentials!

- Trade show or exhibition coming up?
- Have you thought about carrier bags for your literature?

With all the effort and stress that goes into putting on a stand at a trade show or exhibition, those all important carrier bags can often be the last thing on your mind. Don't get caught out! Talk to us about any requirements you may have. Our retail trading division, Abacus Carrier Bags, can supply quality printed bags in quantities as small as 1,000 lots.

New Big Green Machine

In response to customer demands we are upgrading one of our vehicles to another 7½ tonne truck. This will give us increased delivery capacity to help us to continue servicing your growing needs.

We strongly believe delivering on our own vehicles gives us greater control and flexibility, allowing us to be more responsive and deliver a better quality of goods.

Christmas Shutdown

We will close for our Christmas shutdown at 12.00pm on 22nd December, re-opening on 4th January. The last day for deliveries will be 21st December.

It is more prudent than ever, especially on polyethylene products, to look at forward ordering as already extended lead times will go out even further in the run up to Christmas.

Also, there are invariably problems starting machinery up again after Christmas, so it is advisable to ensure sufficient stocks and forward ordering to cover any post-Christmas delays.

Icer – Bar Gels

Our trading division, Icertech, has been very successful during its first year of activity. We now have many satisfied users of our gel packs, developed for keeping products cool during transit.

To complement the gels, we have now launched a range of insulated boxes which can be produced to your exact requirements.

Please call David Jones for more information on gels and boxes.

Green Fingers

We are always trying to improve our working environment and make a positive contribution to our surrounding area. To this end, we have established a herb garden on our site as a resource for our employees and to encourage local wildlife.
